MISSION CONFIGURABLE RIFLE

ARES-15 MCR™

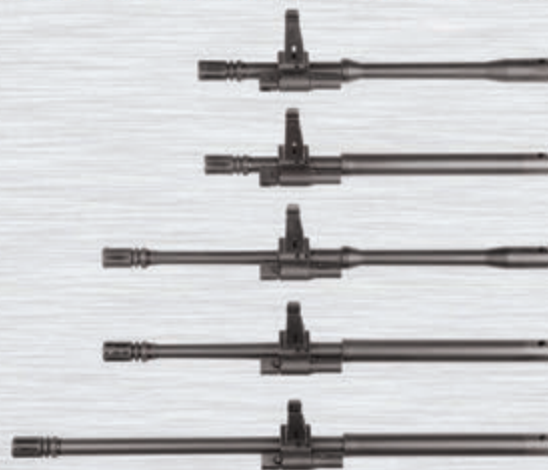

The groundbreaking ARES-15 MCR™ (Mission Configurable Rifle) is in a class of its own and offers exceptional flexibility for the operator. Through implementation of a unique and patented upper receiver system, the semi-automatic ARES-15 MCR™ can be user-configured in seconds without tools to adapt to virtually any mission profile. Specifically designed for responsible armed citizens, law enforcement and professional security personnel; standard features include gas-piston operation for extreme reliability in adverse conditions; a quick-change (3 seconds) barrel system available in 12, 16 and 20 inch lengths; a six-position telescoping stock and a MIL-STD 1913 co-planar hand-guard with rail-interface system for the mounting of optics and modern accessories. Spanning the capability range from the optic ready carbine through lightweight support rifle; the ARES-15 MCR™ can be further configured to a belt-fed rifle by the simple addition of a belt-feed module permitting unprecedented firepower and weapon flexibility.
